

- I. IMMEDIATELY AFTER THE COMMENCEMENT OF THE EXAMINATION, YOU SHOULD CHECK THAT THIS TEST BOOKLET DOES **NOT** HAVE ANY UNPRINTED OR TORN OR MISSING PAGES OR ITEMS, ETC. IF SO, GET IT REPLACED BY A COMPLETE TEST BOOKLET.
- 2. Please note that it is the candidate's responsibility to encode and darken the ROLL NUMBER, TEST BOOKLET SERIES Code A, B, C or D and Question Booklet Number carefully and without any omission or discrepancy at the appropriate places in the OMR Answer Sheet. Any omission/discrepancy will render the OMR Answer Sheet liable for rejection.
- 3. You have to enter your Roll Number on the Test Booklet in the Box provided below. **DO NOT** write **anything else** on the Test Booklet.

1		

**INSTRUCTIONS** 

- 4. This Test Booklet contains 100 items (questions). Each item shall have five options (A, B, C, D, and E). If a candidate is attempting a question, he has to darken most appropriate circle from A, B, C or D. However if you are not attempting a question then you have to darken the circle 'E'. If none of the five circle is darkened, one-fourth (0.25) marks shall be deducted.
- 5. Any candidate not darkening any of the five circles in more than 10% question shall be disqualified.
- 6. All questions are compulsory. Each question carry one mark. For each wrong Answer, one fourth (0.25) mark shall be deducted.
- 7. You have to mark all your responses *ONLY* on the separate OMR Answer Sheet provided. See directions in the OMR Answer Sheet. Use only **BLUE/BLACK Ball Point Pen** to answer in OMR Answer Sheet.
- 8. Before you proceed to mark in the OMR Answer Sheet the response to various items in the Test Booklet, you have to fill in some particulars in the OMR Answer Sheet as per instructions mentioned on the OMR Answer Sheet.
- **9.** At the end of the examination you should handover to the invigilator the original copy and office copy of the OMR Sheet. You are permitted to take away with you the Question Booklet along with candidate's copy of the OMR Sheet.
- 10. Sheets for rough work are appended in the Test Booklet at the end.

1	(A)	ence of the sense of taste on one side Hemianosima Hemigeusia Question not attempted	(B)	ongue is known as : Hemicephalia Hemihyperhidrosis
2	Reas (A) (B) (C) (D)	ertion (A): Sea squirt is placed in Sustan (R): Notochord is present only in A is true but R is false.  A is false but R is true.  Both A and R are true but R is not Both A and R are true and R is the Question not attempted	the c	tail of sea squirt larva.  correct explanation of A.
3	desic (A)	erial cells getting embedded in ecation are called: Zoogloea Forespore Question not attempted		sheath of mucilage to prevent their Endospore Arthospore
4	(A)	process of killing pupa without chan Denier Hatching Question not attempted	(B)	the cocoon shell layer is called: Dupion Stifling
5	The (A) (C) (E)	original specimen used as nomenclate Syntype Topotype Question not attempted		ype is : Paratype Holotype
6	(A)	mplete dwarf bundles in <i>Mirabilis jan</i> Bundle sheath Xylem Question not attempted	lapa (B) (D)	contain only: Sieve tubes Phloem
7	(A) (C)	ch genus of Psilophytopsida is living Psilotum Homeophyton Question not attempted	(B)	Rhynia Cooksonia
8	(A) (C)	ch of the following is NOT a natural Bugs Spiders Question not attempted	(B)	ator of BPH (Brown Plant Hopper)? Red ants All of the above
9	(A)	ch of the following Kinesin microtubut Kinesin- 4 Kinesin- 10 Question not attempted	(B)	bendent motor protein are minus directed? Kinesin- 5 Kinesin- 14
10	Whic (A) (C) (E)	ch of the following is a Coelenterate Sea fan Sea hare Question not attempted	? (B) (D)	Sea lemon Sea star
BI8_	0	2		P.T.O.

11	Which of the following has Deuterostomic tube plan?  (A) Round worm (B) Mollusca (C) Arthropod (D) Echinoderms (E) Question not attempted
12	Which one of the following is zygomorphic flower?  (A) Pea (B) Acacia  (C) Sunflower (D) Ocimum  (E) Question not attempted
13	A carbohydrate which is used to solidify bacterial culture media :  (A) Cellulose (B) Agar (C) Xylose (D) Erythrose (E) Question not attempted
14	How many amino acids form one turn of alpha helix of a protein?  (A) 5 (B) 3 (C) 4.2 (D) 3.6 (E) Question not attempted
15	Out of the following enzymes, which one is fastest?  (A) Catalase (B) Lactase (C) Carbonic anhydrase (D) Lipase (E) Question not attempted
16	When a person is suffering from poor renal reabsorption then which of the following will NOT help in the maintenance of blood volume?  (A) Decreased glomerular filtration (B) Increased ADH secretion (C) Decreased arterial pressure in kidney(D) Increased arterial pressure in kidney (E) Question not attempted
17	A person is taking a drug that causes, among other things, dryness of the mouth and speeding of the heart rate but no impairment of the ability to use the skeletal muscles. What type of receptor does this drug probably block?  (A) Cholinergic muscarinic receptors  (B) Cholinergic nicotinic receptors  (C) Dopaminergic receptors  (D) Glutamate receptors  (E) Question not attempted
18	Energy for photophosphorylation comes from :  (A) Electron gradient  (B) Proton gradient  (C) Redox potential  (D) NADPH

SNARE complexes are important for guiding synaptic transmission and Ca<sup>2+</sup> binding is 19 essential for activation of neurotransmitter release from the pre synaptic terminal. In view of the above, identify the components of the SNARE complex that are activated in a sequential manner in order to facilitate neurotransmitter uptake, docking and release.

(A) Syntaxin – Synaptotagmin – Sinaptobrevin

- (B)
- Synaptotagmin Sinaptobrevin SNAP-25 Sinaptobrevin Syntaxin SNAP-25 (C)
- (D) SNAP-25 – Synaptotagmin– Syntaxin
- Question not attempted (E)

(E) Question not attempted

20		ride injury is related with : Carnation Chrysanthemum Question not attempted	(B) (D)	Gerbera Gladiolus
21		notosynthesising plant is releasing $^{18}$ supplied with : $^{O_3}$ $^{CO_2}$ with $^{18}$ O Question not attempted		re than the normal. The plant must have $H_2O$ with $^{18}O$ $C_6H_{12}O_6$ with $^{18}O$
22	This (A) (C) (E)	biomolecule on the cell membranes Carbohydrate tag of Glycolipids Protein tag of lipoproteins Question not attempted	(B)	helps in cell recognition: Carbohydrate tag of Glycoproteins Protein tag of Glycoproteins

- (E) Question not attempted
- 30 Identify the correct statement on 'inhibin'.
  - (A) Inhibits the secretion of LH, FSH and Prolactin
  - (B) Is produced by granulosa cells in ovary and inhibits the secretion of FSH
  - (C) Is produced by granulosa cells in ovary and inhibits the secretion of LH
  - (D) Is produced by nurse cells in testis and inhibits the secretion of LH
  - (E) Question not attempted
- 31 If the menstrual cycle is of 35 days, then what is the risk period (cycle starts on 1<sup>st</sup> day):
  - (A) 9<sup>th</sup> to 17<sup>th</sup> days

(B) 11<sup>th</sup> to 18<sup>th</sup> days

(C) 16<sup>th</sup> to 24<sup>th</sup> days

(D) 18<sup>th</sup> to 35<sup>th</sup> days

- (E) Question not attempted
- 32 Cat cry syndrome is caused due to :
  - (A) Loss of segment of 9<sup>th</sup> chromosome
  - (B) Loss of small segment of 5<sup>th</sup> chromosome
  - (C) Deletion of fragment of 22<sup>nd</sup> chromosome
  - (D) Loss of fragment of 21st chromosome
  - (E) Question not attempted
- 33 The genetic formula of a double monosomic is written as:
  - (A) 2n-1

(B) 2n-2

(C) 2n-1-1

- (D) 2n+2
- (E) Question not attempted
- The genetic relatedness (r) of an individual to his nephew is 0.25. The alleles that cause uncles to care of nephews will spread according to Hamilton's Rule, only if the fitness benefit is:
  - (A) Equal to the cost of care
- (B) More than the cost of care by 25%
- (C) Double the cost of care
- (D) Four times the cost of care
- (E) Question not attempted
- 35 The frequencies of two alleles p and q for a gene locus in a population at Hardy-Weinberg equilibrium are 0.3 and 0.7, respectively. After a few generations of inbreeding, the heterozygote frequency was found to be 0.28, the inbreeding coefficient in this case is:
  - (A) 0.42

(B) 0.28

(C) 0.33

- (D) 0.673
- (E) Question not attempted
- 36  $\alpha$ -amanitin is a fungal toxin which inhibits eukaryotic RNA polymerases. The three eukaryotic RNA polymerases show differential sensitivity to this toxin. Which one of the following order (higher to lower) is correct in respect of sensitivity towards  $\alpha$ -amanitin?
  - (A) RNA Pol III > RNA Pol II > RNA Pol I
  - (B) RNA Pol II > RNA Pol III > RNA Pol I
  - (C) RNA Pol I > RNA Pol III > RNA Pol II
  - (D) RNA Pol II > RNA Pol I > RNA Pol III

- The Galapagos finches were an important clue to Darwin's thinking about the origin of species. These finches are believed to have descended from a single ancestral species that colonized the Galapagos archipelago, America, over a short period of time. The Galapagos finches differ in their beak shape and size. Different species feed on seeds that vary in size and hardness. Which of the following is the most likely explanation for these patterns?
  - (A) The finches represent an example of directional trend in beak size from small to big
  - (B) Beak shapes changed in response to different seed types and these changes were inherited by subsequent generations
  - (C) The ancestral finch already had all the beak variations and different lineages formed that were specialized to ear different seed types
  - (D) The finches represent an example of adaptive radiation in which beak variation was generated by mutation followed by selection by different seed types.
  - (E) Question not attempted
- 56 Animals with wide range of tolerance for salinity are called:
  - (A) Tenohaline

(B) Euryhaline

(C) Stenohaline

(D) Perihaline

- (E) Question not attempted

79	is highly regulated in eukaryotic cells. In an expectation with (eIF4E) gene for its overexpression (A) Apoptosis	periment, a researcher transfected mammalian

- (A) Neither transcription nor translation of specific genes
- (B) Translation of specific mRNAs
- (C) DNA replication
- (D) Transcription of all genes
- (E) Question not attempted
- Hari is  $2\frac{1}{2}$  times as good as a workman as Kishan. Therefore, he can finish a given job in 42 days less than Kishan can. By working together, in how many days can Hari and Kishan finish the job?
  - (A) 28 days

(B) 24 days

(C) 20 days

- (D) 16 days
- (E) Question not attempted
- 82 If 1 + 5 + 9 + 13 + ... + x = 496, find the value of 'x'.
  - (A) 57

(B) 59

(C) 61

- (D) 63
- (E) Question not attempted
- A man is draining out petrol from a large drum into a storage tank measuring  $72 \text{ cm} \times 40 \text{ cm} \times 50 \text{ cm}$ . The storage tank already has 18 L of petrol in it. When petrol is filled up to  $3/8^{th}$  height of the storage tank,  $5/9^{th}$  part of the drum was still filled with petrol. How much petrol was there in the drum in the beginning?
  - (A) 75 L

(B) 78 L

(C) 81 L

- (D) 84 L
- (E) Question not attempted
- Three years ago, a man's age was twice the square of his son's age. In seven years from now, his age will be three times his son's age. Find their present ages.
  - (A) Man's age = 28 yrs, son's age = 4 yrs
  - (B) Man's age = 30 yrs, son's age = 5 yrs
  - (C) Man's age = 32 yrs, son's age = 6 yrs
  - (D) Man's age = 35 yrs, son'sage = 7 yrs
  - (E) Question not attempted
- Ajay and Amit move from points A to B, 33 km apart, in a straight path at speeds of 5 kmph and 6 kmph, respectively. Amit reaches point B, turns back immediately and as he is walking back to point A, meets Ajay at point C. Find the distance from A to C.
  - (A) 22 km

(B) 25 km

(C) 28 km

- (D) 30 km
- (E) Question not attempted

- **Qs. 86-87:** Each of these questions contains six statements followed by four sets of combinations of three. Choose the set in which the statements are logically related.
- **86** a. Sham won a lottery.
  - b. Sham lost in a chess game.
  - c. Sham is not intelligent.
  - d. One need not be intelligent to win a lottery.
  - e. One need not be intelligent to win a chess game.
  - f. Sham plays chess.
  - (A) bef

(B) acd

(C) bde

(D) bdf

- (E) Question not attempted
- 87 a. Some college athletes are professionals.
  - b. No college athlete is a professional.
  - c. Some professionals are well paid.
  - d. All professionals are well paid.
  - e. All well paid persons are professionals.
  - f. No well paid person is a college athlete.
  - (A) bef

(B) abf

(C) bdf

(D) acf

- (E) Question not attempted
- Qs. 88-90: Each of these has a question followed by two statements I and II. Mark the answer as:
  - (A) if the question can be answered with the help of statement I alone,
  - (B) if the question can be answered with the help of statement II alone,
  - (C) if both the statements I and II are needed to answer the question, and
  - (D) if the question cannot be answered even with the help of both the statements.
  - (E) Question not attempted
- 88 Mr. X takes the morning train to his office from Station A to go to Station B, and his colleague Mr. Y joins him on the way. There are three stations C, D and E on the way not necessarily in that sequence. What is the sequence of these stations during the journey?
  - I. Mr. Y boards the train at D.
  - II. Mr. Z, who travels between C and D, has two segments of journey in common with Mr. X, but no segment of journey common with Mr. Y.
- How many people (from the group surveyed) read both newspapers 'Indian Express' and 'Times of India'?
  - I. Out of the total 200 readers surveyed, 100 read Indian Express, 120 read Times of India and 50 read The Hindu.
  - II. Out of the total of 200 readers surveyed, 100 read Indian Express, 120 read Times of India and 50 read neither.
- What are the ages of the three brothers?
  - I. The product of their ages is 21.
  - II. The sum of their ages is not divisible by 3.

Qs 96-100: Answer the questions based on the contents of the passage given below:

Five years ago, The Economist declared that data and not oil, is the world's most valuable resource. A slew of analyses, interpretations and projections followed. This month, the former deputy prime minister of the United Kingdom, made headlines with his statement that data isn't finite and limited like oil, rather, it is like air, which can't be contained. Many industrialists now hail data as the raw material. Data forms the bedrock on which today's knowledge pyramid rises towards awareness, understanding and finally, wisdom, which is essential for nuanced and effective policymaking. The World Development Report 2021 asserts that there is a need for forging a new social contract for data which accelerates data use and reuse to realise greater value, creates equitable access to benefits, integrates national data systems, and finally fosters trust such that people are protected from the harms of data misuse. We must construct new rules for this data age, and the road ahead signals some critical but surmountable challenges. For instance, less than 20% of low - and middle-income countries have modern data infrastructures such as colocation data centres and direct access to cloud computing facilities. In India, public data remains inaccessible because many government officers don't want to put data out in the public domain. Data is also siloed across sectors. As we enter India's "techade", data must be accessible to all citizens. We must adopt a multisectoral approach to collecting, integrating, and interpreting data. This will strengthen service delivery by governments at all levels. Data should be presented in a simplified and decluttered manner to maximise the benefits. When it comes to data governance, India offers a range of best practices which can be emulated and advanced by other nations. The Data Governance Quality Index (DGQl) enables government agencies to undertake a detailed self-assessment of their datapreparedness levels. It helps ministries advance towards an optimal data-driven outcome tracking, and data governance architecture. Even as terabytes of data flow through the government's data pipeline involving collection, cleaning, processing, analysis, modelling and visualisation, the pipeline is constrained with structural plague. This plague comes from databases being inaccessible and siloed, and data platforms being cluttered with complexity without any flexibility to innovate.

96 Which of the following statements are not borne out by the contents of the passage?

- i. Nowadays it costs more money for governments to acquire certain kinds of data from other countries as compared to the cost of oil.
- ii. Clearly data is a costlier resource to produce than is oil.
- iii. Wisdom for governments is in acquiring data purely as a raw material at lower costs and convert the same into proper information to be utilised equitably for public good.
- (A) i and ii

(B) i and iii

(C) ii and iii

- (D) i, ii and iii
- (E) Question not attempted

- In the context of the passage which of the following statements could be taken as the most accurate assessment of the author's opinion about data?
  - (A) It forms the base of the pyramid on top of which could be placed the knowledge or wisdom that is an asset to policymakers.
  - (B) The value of data depends on how well it is shared between countries for wider social good.
  - (C) Data offers best value when it is developed separately for different sectors as per their individual needs.
  - (D) Data creation and management must be done equitably across all the countries.
  - (E) Question not attempted
- 98 As per the passage, handling of data by the government encompasses all the following aspects except:
  - i. Ensuring its repeated use by a wide cross-section of stakeholders to extract the maximum benefit out of it.
  - ii. Using it as a tool to negotiate better oil deals with the supplier countries.
  - iii. Laying down norms complying with DGQI Standards for the different stakeholders to utilise the data provided by it in a controlled way, as only that would prevent data plaque formation.
  - (A) i and ii

(B) ii and iii

(C) i and iii

- (D) i, ii and iii
- (E) Question not attempted
- Which of the following options is synonymous with the word "plaque" in the context of the passage?
  - (A) Failure

(B) Corrupting

(C) Rusting

- (D) Clogging
- (E) Question not attempted
- 100 Which of the following options is closest in meaning to the word "siloed" as it is used in the passage?
  - (A) Lost

(B) Protected

(C) Banned for use

- (D) Complicated
- (E) Question not attempted

BI8\_0

Final Answer Key of the Master Question Booklet of the Screening Test held on 10.09.2023 for the Posts of Post Graduate Teachers (PGTs) in the subject of Biology for Mewat Cadre (Advt No. 33/2023)
